

## Outline

### Introduction/Background:

- Problem Statement
- Review of Events: WannaCry ransomware, Equifax data breach, NotPetya ransomware, and cyber espionage campaigns led by APT 28 and APT 29
- Significance of solving cybercrimes over international borders
- Methodology: Comparative Analysis, Pattern Recognition, Contextualization, and Generalization through legal documents available.
- Thesis

### Body (a paragraph for each topic):

- Background of the study
- In-depth introduction and analysis of WannaCry Ransomware
- In-depth introduction and analysis of NotPetya Ransomware
- Comparative analysis of WannaCry and NotPetya
- In-depth introduction and analysis of Equifax data breach
- Comparative analysis between the two ransomware and most significant data breach
- In-depth analysis of APT 28 and APT 29
  - Could also mention APT 1
- Comparative analysis between APT 28 and APT 29
  - Could also mention APT 1
- Overall evaluation of legal frameworks and mechanism

### Conclusion:

- Restate Thesis
- Summary of Analysis
- Gaps in the current research and future scope
- Recommendation for future improvements and further collaborations to bring justice
